About This Book

The PCGS Coin Numbering System lists the coin numbers for each and every type of coin that PCGS grades. Each coin number identifies the type of coin by date, denomination, variety (if any), and designation. Listing the coin number on your invoice for each coin submitted helps us to quickly process your order. Instead of inputting the date and denomination of each coin received, the coin number is easily recognized by our computer system. If you would like to receive the PCGS Coin Numbering System on CD, please contact our customer service department at **800-447-8848** for further details.

The PCGS Coin Numbering System lists preliminary coin numbers that are used to complete PCGS submission invoices. Certain coin numbers have been omitted from this book to avoid misidentification of coins. PCGS graders assign more specific coin numbers when they grade your coins. See the following page for details.

The coin numbers are directly linked to the **PCGS Population Report**, a census listing of more than 16,000,00 coins which have been certified by PCGS. Call us at **800-447-8848** to subscribe to this valuable report. You may also visit our website (www.pcgs.com) and sign up for a subscription to our online PCGS Population Report.

The Standard for the Rare Coin Industry

How To Use the PCGS Numbering System

The first half of the PCGS coin numbering book contains Mint State U.S. Regular Issues, and the second half contains Proof U.S. Regular Issues. The PCGS coin numbering book also contains Colonial (Early American) coins, Canadian and Province coin numbers at the end of the book. Within these sections, the coins are listed by denomination, followed by the date.

First, consult the Table of Contents to determine the appropriate section for your coin. After turning to the appropriate page, search for the denomination listing and the specific information about your coin.

For example

1. **1880-0 Silver dollar** (\$\$1) will be found on **page 22**.

Notice that the page is divided into three columns. You will find the 1880-0 (\$\$1) in the **third column, center left side**.

2. The **PCGS coin number** for this coin is **7114**.

3. Note that if the coin has a mint mark, the suffix is listed after the year (i.e. New Orleans “1880-O,” and San Francisco “1873-S”). In these cases, write the coin number that is listed for your coin’s particular mint mark.

How to Write Coin Numbers on PCGS Submission Forms:

The coin number, date, denomination, variety and designation columns on the PCGS submission invoice correspond directly to the coin numbering system. Copy the information onto the invoice EXACTLY as it appears in the coin numbering system. Do not make up your own varieties, etc. Judd numbers are currently included in the PCGS Coin Numbering System. PCGS requests that you indicate the Judd number in the variety column of the invoice.

Important Note:

Do not use coin numbers which do not appear in the PCGS Coin Numbering System. Also, be sure to use the most current edition. This edition includes coin numbers for Canadian and Province coins. However, it does not include coin numbers for other foreign issues. For all other foreign issues the PCGS coin number column may be left blank.

Please follow the standardized submission procedures for all coins with special designations (copper, Mercury dimes, and Morgan dollars). Specifically:

- A) Submit all Mercury dimes with a **MSFB** number
- B) Submit all Half cents and Large cents with a **BN** number
- C) Submit all other Copper (except Lincoln cents) with a **RB** number
- D) Submit all Lincoln cents with a **RD** number
- E) Submit all Morgan dollars with a **NON-PL** number
- F) Submit all Standing Liberty quarters with a **NON-FH** number
- G) Submit all Cameos with a **NON-CAMEO** number

You only need to designate “MS” (Mint State) or “PR” (Proof) on U.S. coins. How you designate the coin will not affect how the coin is graded. PCGS graders will determine finer distinctions when they examine your coins.
